

TruMobile

nationwide cellular solution

THE DIFFERENCE

Over the past 25 years, the Mobile Phone revolution has significantly altered the way dealerships communicate rivaling only the Personal Computer and Internet revolutions.

TruMobile is a nationwide mobile phone fully integrated into your hosted VoIP system and dealership CRM application. Unlike other "app based" solutions, it is a "native" extension of your desk phone giving your employees the freedom to be more productive. By adding TruRecord, mobile phones can be recorded, analyzed and used to input Voice notes directly into your CRM.

NATIONWIDE NETWORK

OVER 300+ FEATURES

CRM INTEGRATION

Fully integrates with all the leading dealership CRM applications, publishing complete call details of every inbound and outbound call to your CRM application. Calls from any device; desk phone, mobile phone, cordless phone, tablet or soft phone can be logged into the customer's CRM record.

CALL RECORDING

TruRecord technology records & analyzes all inbound and outbound, local or toll free, landline and cellular calls. In addition to recording calls, TruRecord provides a comprehensive view of every call that goes through your current communications system. You can capture, record, organize and analyze all of the calls coming to and from your dealership.

MOBILE INTEGRATION

Natively extends the over 300+ features of our hosted VoIP service to your mobile phone so your employees become more mobile and reachable with one phone number and one voicemail, maximizing your communications investment. Allows for increased employee productivity, call management, call efficiency, and service to your customers.
